

SSCS Parent Survey Question #1 --2009

What would you like to see us add in the way of services for your students at SSCS?

Parent Responses

More vendors in Sac. Area

Just continued growth, maybe more vendors in Yolo county.

Learning Center

nothing

nothing

Extending the available funds for extra curricular activities to more than 30%. When we have all of our books but can only allocate a few months of karate membership, and have to pay the rest of the semester ourselves, or remove them and wait several months to re enroll them. It only hurts the children

Parents/kids once a month get together to discuss ideas-plan events, field trips for children to

We have everything we need now. Thank you for offering such a great school!

I would like to see a way of more networking for the kids, like a group. Also somethings like a science fair and art show would be great

None

A school-wide library/resource center for borrowing materials and supplies instead of everything coming out of student's budgets

more field trips

more Elk Grove classes/vendors for extra curricular activities

continue and growth of CP classes

More athletics and more local cooking classes. Discounted Fine Art tickets, ie Mondari Center

More hours with a teacher

Maybe some high school classes in Math and Science

More and varied tutoring options, classes

less work for students

My ES is trying to get our local community center to participate so I can use funding to enroll our child in local sports/activities

Online writing prep for early writing assignment

I'm pleased with all your services

The services are wonderful

Nothing except the ability to get computers and be able to keep them after the program is over.

Consider that some people are unable to get computers.

Classes in Elk Grove, such as core classes, or art, guitar, etc.

All fine

Nothing at this time- on second though, maybe some kind of resource library with materials that could be borrowed

I'm happy with the services provided

Field trips and ski trips, curriculum library

Cannot think of any at this time

NO idea: great school!

I think classes for highschoolers, down the road, will be an helpful addition, but then that takes away from funding, so its a catch-22

More up-front knowledge of group student activities for upper grade students- maybe a newsletter (for peer group relationships)

more writing helps? online maybe?

More things to do

Guidance for those of us who have children that are more advanced and still in elementary-middle school

I'd like to be able to subscribe to a dyslexia web site

More field trips, and classes in the South Sac Area

Swim lessons thru Sea Otter Swim in Loomis, CA

band in Woodland CA- I will work on it next year

Second language programs

I am happy so far with what you have to offer

More ease with using different vendors, Less paperwork with adding contract labor

nothing at this time

nothing

More online computer classes.

More outdoor recreation- hiking, climbing, etc

nothing at this time

Shop classes

Local student interaction. Tutoring, sports, more with students that go to this school

Brain Pop for all students

Discovery Video streaming

Online Encyclopedia

Maybe a writing class, if there was a local vendor

Nothing I can think of at this moment

Nothing

Nothing

A couple of activities at the library run by volunteers (if possible) so kids could get to know

Lending library

Classes!

A way of donating used books, science lab supplies, etc. to other home schoolers after we are finished with them. This is our 1st year and I don't know exactly what some things mean

Help finding work or internships

It would be nice to have some sort of curriculum resource center

Nothing I can think of at this time.

It would be good to have group classes, especially science labs for high school

Streamline vendor application process, so that more vendors would be willing to become SSCS vendors

Children's computer classes

I think it's great!

More classes offered: Math, English, etc.

Field trips, art classes, music lessons

An organized time/place to meet with children the same age

To have all unused curriculum housed in one area/building or to put it on the web-site, so parents can have access to other curriculum/supplies. It would save families money not having to buy stuff when its available, example, T. Editions are expensive, can use up a lot of money. There should be a check in/check out system

Resource/learning center where classes could be offered or ES's could tutor. Library would be great too in the center

None, just continue to be flexible

maybe more GEAs like IMAX and Disney on Ice; more educational entertainment.
